

UNUSED EQUIPMENT VALUATION

The application allows for financial gain through resource optimization: internal reuse and external resale of unused equipment

IN BRIEF

CHALLENGES

- ❖ Custom-design an internal e-commerce-like platform
- ❖ manage material transfers both internally and externally

BENEFITS

- ❖ Waste reduction and increased equipment sustainability
- ❖ Financial gain
- ❖ 90% productivity and management gain

CHALLENGE

Design an application enabling the valorization of refurbished equipment during the dismantling of certain production facilities : during a first project, GxpManager custom-designed an application to oversee the dismantling.

SOLUTION

Our client aims to establish an internal e-commerce-like platform. The goal is to manage material transfers both internally and externally (sales and donations of equipment or individual parts to other companies)

Main application features :

- ❖ Precise inventory of equipment
- ❖ Precise inventory of equipment
- ❖ Workflows: Process automation to facilitate progress and electronic signatures at each workflow stage
- ❖ Traceability (audit trail): Tracking all information modifications/deletions/creations
- ❖ Data archiving for each material transfer
- ❖ Real-time data analysis and publishing of customized reports

BENEFITS

- ❖ Waste reduction and increased equipment sustainability
- ❖ Financial gain through internal resource optimization and external equipment sales
- ❖ Digitalization of operations and innovation
- ❖ 90% productivity and management gain, through process optimization and eradication of manual procedures
- ❖ Traceability of all movements
- ❖ Better overall view through key performance indicator tracking
- ❖ An agile solution capable of adapting to client's evolving demands

BESPOKE APPLICATION

The No Code Low Code approach enables the rapid creation of applications without spending months on requirements gathering. Project management using agile sprint methodology fosters close collaboration between the consultant and the client.

ADVANTAGES of No Code Low Code:

- ❖ Reduced development timelines
- ❖ Cost savings
- ❖ High flexibility
