DIGITIZE PAPER FORMS

Forms' digitization while respecting the content, the structure, the signature processes and the regulatory requirement of the biotech industry.

CHALLENGE

Digitize over 1000 paper forms without altering the content and signature processes, without burdening users, and when possible, by simplifying the process.

SOLUTION

Implemented the « GxpForms » application in collaboration with the client, so that users could create, fill out and track form with electronic signatures and with ease.

Thanks to its agile and Low Code/No Code configurator, the client and users were more involved in the creation and the enhancement of their applications.

All of this while respecting industry regulations and keeping the forms' integrity.

BENEFITS

The application allowed the client to :

- Store / archive digitalized forms
- Manage mandatory information entries
- Control the version of the forms
- Gain in productivity thanks to mastered validation and signature path
- Electronically sign forms from the workstation (less travel)
- Trace all modifications/deletions/creations of information thanks to the audit trail
- Use the data entered in reports in Word, PDF or Excel format
- Create performance indicators for forms monitoring

IN A FEW WORDS

CHALLENGES

- 1000 forms to be digitized
- Signature processes
- Data integrity

BENEFITS

- Electronic forms
- Control of versions
- Electronic signature
- Traceability
- Performance Indicator

GXP FORMS

GxpForms, No Code / Low Code, solution allows you to digitize paper, PDF, Word™ or Excel™ forms, by creating digitized forms on our SaaS platform GxpManager.

COMPLIANCE

- Compliance 21 CFR Part 11
- To international regulations :
  EMA, FDA, GMP, ISO
- Qualified application
