QMS-4-SME :
A ready-to-use Quality Management System

A quality management solution that consolidates your quality processes on a single platform, providing an overview of compliance and operational quality management throughout the life cycle of your products.

GxpManager QMS-4-SME is a platform that includes applications that allow you to follow up on your quality actions (CAPA), non-conformance, change control, and training follow-ups. QMS-4-SME simplifies your audits and preventive actions.

GXPMANAGER THE LCNC PLATFORM

GxpManager is a software editor since 2003 offering a Low Code No Code (LCNC) platform in SaaS architecture. The GxpManager platform facilitates the sharing of information in real time and in a secure manner.

- 100% customizable
- Easy collaboration
- Data integrity
- VaaS – Validation As A Service

GxpManager QMS-4-SME

The auditable and compliant quality management software

CAPA

A Corrective and Preventive Action Plan is essential to maintain a quality control system to meet current regulations.

- Fast and easy registration of corrective and preventive actions with online forms
- Track the corrective action process step by step, in complete security
- Validation of steps through workflows in line with your internal processes

Non-Conformance

The registration of a Non-Conformance must be quick and easy to have a compliant follow-up.

- Recording of Non-Conformance with fields adapted to your industry
- Real-time follow-up of the actions
- Save time in processing and validating
- Non-Conformance real-time follow-up dashboard

Change Control

Change Control and quality systems are priorities for many industries, with a need to align with regulatory changes, process changes, and technologies to ensure process control and, ultimately, product quality.

- Control of change processes with complete transparency: impacts, analyses, risks...
- Traceability of all actions
- Control of the documentation required for each Change Control
- Incorporate all necessary details to avoid failures
- Complete monitoring of processes with macro and micro views of change elements

Training Management

The training management allows the follow-up of the professional training proposed to your employees and the evolution of their knowledge.

- Training follow-up
- Workflows and notifications

Electronic Document Management

The organization of the documentation related to the quality process is central to ensuring the conformity and traceability of the elements of each application.

- Simplified the creation and addition of documents in the quality process
- Quick and simplified access to the documentation in the management of internal and external audits
- Collaborative writing of documents with version control

BENEFITS FOR THE QUALITY DEPARTMENT

- Centralized system on a single platform
- Macro and micro vision of objectives, defective elements, and progress
- Save time in quality management, actions, documentation follow-up
- Access Management to applications and workflows

BENEFITS FOR USERS

- Centralization of applications and information in one place
- Real-time monitoring of actions and tasks to be performed thanks to the workflows
- A single platform for all applications, up-to-date and easily accessible information
- Involvement in the improvement of the quality system
