GxpQMS by GxpManager

The auditable and compliant Quality Management Software

GxpQMS represents the solution designed to simplify and enhance Quality System Management. Through its adaptable applications and compliance with standards such as Good Manufacturing Practices (GMP), Code of Federal Regulations (CFR) Part 21 Section 11, EU Annex 11, and current ISO norms, GxpQMS perfectly aligns with your requirements.

CAPA

A Corrective and Preventive Action plan is essential to maintain an efficient Quality and Control system to meet current regulations.

- Swift recording of corrective and preventive actions through online forms
- Step-by-step tracking of corrective action processes, securely
- Step validation through workflows calibrated to your internal processes

Non-conformance

Recording non-conformance quickly is crucial to maintaining compliant tracking.

- Recording non-conformance with fields adapted to your industry
- Real-time tracking of action progress
- Time-saving in processing and validation
- Non-conformance tracking dashboard

Change Control

Managing changes within a company is a significant concern in many industries, demanding consistent alignment with regulatory developments, method adjustments, and technological advancements. These are crucial to ensure optimal process oversight and product quality.

- Control of change processes with complete transparency: impacts, analyses, risks, and more
- Traceability of all actions
- Control of necessary documentation for each Change Control
- Inclusion of all required details to prevent shortcomings
- Comprehensive process monitoring with both macro and micro views of change elements

Quality Documents Management

Organizing documentation related to the Quality Management System is central to ensuring compliance and traceability of elements within each application.

- Simplify the creation and addition of documents in the quality process
- Quick and easy access to documentation for both internal and external audits
- Collaborative document drafting with version control

GXPMANAGER, THE LCNC PLATFORM

GxpManager, a software editor since 2003, proposes a Low Code No Code (LCNC) platform in SaaS architecture. The GxpManager platform facilitates the sharing of information in real-time and securely.

- 100% customizable
- Easy collaboration
- Data integrity
- VaaS - Validation As A Service

Training management

Effective training management tracks professional development opportunities for your staff, ensuring continuous employee skill evolution.

- Training tracking
- Workflows and notifications
